

CAREER OBJECTIVE

Computer Engineering student with hands-on experience in full-stack web development and application deployment. I have worked with APIs, AWS cloud services, Dockerfiles, CI/CD pipelines, and Linux environments while building real-world projects. Seeking a software or web developer role.

WORK EXPERIENCE

Full-Stack Software Engineer Intern • Internship

May 2025 - Jan 2026

ASSUREME TECHNOLOGIES PRIVATE LIMITED, Virtual

Built and maintained backend APIs and integrated them with frontend system for a production application. Deployed and managed application software infrastructure using AWS S3, Vercel deployment, and whole deployment pipeline. worked with PostgreSQL, Supabase and firebase to handle authentication, data storage in AWS s3 for storing images and backend services. co-ordinated with development team, guided task execution, ensured timely delivery of features.

EDUCATION

Bachelor of Engineering (B.E), Computer Science & Engineering

2024 - 2027

Government College Of Engineering, Chandrapur

Diploma, Computer Science & Engineering

2022 - 2024

Government Polytechnic, Arvi

Percentage: 81.00%

TRAININGS / CERTIFICATIONS

Sigma 9.0

Aug 2025 - Present

APNA Collage, Virtual

Structured training in Data structures and Algorithms in java and full stack web development. Worked on backend development, database, system-level problem solving. built and practical real world projects with hands-on coding and implementation focus.

PORTFOLIO

PROJECTS

Admin Panel & Data Management System (AssureMe)

Sep 2025

Designed and developed a full stack admin panel to manage website content, user data and platform settings. implemented features to update UI elements such as widgets, button, fonts, and user accounts through the admin interface. Built backend API to retrieve from main database supbase, manage structured user and marketing data.

[AI-Enhanced Virtual Coding Lab](#)

Jan 2026 - Present

Built a full stack virtual coding lab platform to digitize and automate programming practicals for CSE students. Implemented role-based workflow for students and teacher, including dynamic subject and practical management. Enabled multi-language code execution and execution based on submission with semester-wise progress tracking. Designed scalable backend architecture with PostgreSQL and deployed the system on cloud infrastructure, vercel cloud platform.
