

Bhuvansai Chilamkurthi

chbhuvansai522@gmail.com - [in](#) - [G](#) - [G](#) - Hyderabad, India

Objective

AI Engineering student with hands-on experience building using LangChain, Machine learning, python, SQL-backed pipelines, and full-stack applications. Skilled in prototyping AI workflows and developing production-ready features for enterprise-scale analytics.

Education

B.Tech, Computer Science and Engineering
Malla Reddy University, Hyderabad
CGPA: 8.93/10.0 (Current)

2022 – 2026

Technical Skills

- **Programming Languages:** Python, Java
 - **Web Development:** React.js, Node.js, FastAPI
 - **Databases:** MySQL, MongoDB, PostgreSQL
 - **Data Processing:** ETL, Pandas, NumPy, SQL-based pipelines
 - **Data Science & ML:** Pandas, NumPy, scikit-learn, NLTK, spaCy, Transformers, LangChain
 - **Cloud:** AWS, Salesforce
-

Key Projects

HealthBot: Personalized Medical Report Analyzer

[GitHub](#)

- Built RAG-based system with LangChain for multi-agent report analysis, achieving 90% accuracy on 50+ medical reports.
- Developed React.js UI and FastAPI backend, improving engagement by 25% for 30+ beta testers.

Automated Book Publisher

[GitHub](#)

- Developed an AI-driven multi-agent pipeline (Writer → Editor → Reviewer) for scraping, rewriting, and publishing book chapters.
- Built an interactive Streamlit frontend with chapter navigation, search, and version management.
- Integrated Gemini LLM for chapter rewriting, ChromaDB for semantic storage/retrieval.
- Automated web scraping pipelines using BeautifulSoup, enabling ingestion of external book content.

Heart Disease prediction-Admin Dashboard

[GitHub](#)

- Built an interactive Streamlit web app for real-time heart disease prediction.
- Designed SQLite database schema (admin, users, predictions) with authentication and SHA-256 password hashing.
- Trained ML models using scikit-learn (Logistic Regression, Random Forest) with 85% accuracy, serialized via pickle.
- Implemented report generation with ReportLab, analytics dashboards with pandas, NumPy, matplotlib.

Personal Portfolio Website with AI Chatbot

[Live Demo](#)

- Built and deployed a responsive portfolio using **React.js + Vercel**.
- Integrated an **AI chatbot** trained on personal data to answer questions about my skills and projects.
- Showcases 6+ AI/ML projects, resume, and achievements in an interactive UI.

Automatic Grammar Checker

[GitHub](#)

- Built NLP system with Gramformer, FLAN-T5, and LangChain, achieving 92% accuracy on 200+ documents. Trained using machine learning.
 - Developed FastAPI and React.js app for real-time error correction for 100+ users.
-

Certifications

- AWS Academy Graduate – Cloud Foundations AWS Academy (Mar 2025)
- Python for Everybody – Coursera (May 2024)
- Programming in Java – NPTEL (Sep 2024)
- Google Cloud Computing – Google Developer Student Club (Oct 2024)

Achievements

- Secured Second Prize in National Hackathon (500+ participants) for Generative AI chatbot (2024).
- National Semi-Finalist, Tata Imagination Challenge, top 3 rounds (2024).
